Our near-term priority is initiating the Phase 3 *ReConnection* program for BPL-003 this quarter, while VLS-01 continues to progress toward anticipated Phase 2 topline results later this year. The positive Phase 2a data for EMP-01 further demonstrated its potential in Social Anxiety Disorder. Collectively, our capital position, pipeline breadth, and multiple near- and mid-term clinical catalysts position us well as we seek to build sustained clinical and shareholder value."

### Program Updates

## Consolidated Financial Results

*Cash, cash equivalents, and short-term securities (primarily US treasuries):* As of March 31, 2026, the Company had cash, cash equivalents and short-term securities of \$209.9 million compared to \$220.7 million as of December 31, 2025. The \$10.8 million decrease is primarily attributable to \$21.1 million used in operations, partially offset by \$9.5 million in proceeds from sale of equity holdings. *Research and development (R&D) expenses:* R&D expenses were \$17.4 million for the three months ended March 31, 2026 as compared to \$11.3 million for the same prior year period. The year-over-year increase of \$6.1 million was primarily attributable to higher clinical development and related costs in support of BPL-003, VLS-01 and EMP-01, as well as increased personnel-related expenses as a result of our strategic combination with Beckley Psytech in November 2025.

*General and administrative (G&A) expenses:* G&A expenses for the three months ended March 31, 2026, were \$14.4 million as compared to \$10.6 million for the same prior year period.
